

## Brave Control Solutions Announcement

### Subject: Jeremy Warnock Vice President of Engineering

Windsor, Ontario – Brave Control Solutions Inc. is pleased to announce that Jeremy Warnock has joined the team as Vice President of Operations. Jeremy will lead our delivery teams and be responsible for services and solution delivery.

Jeremy's career started at Ford Motor Company as an engineer, then later at JMP Solutions where he served as a Senior Controls Designer and Technical Leader. For the past 15 years, Jeremy has led teams at Dainty Foods in various engineering management capacities. Jeremy brings a wealth of experience in the manufacturing industry with expertise in automated systems and controls engineering.

*"We are extremely pleased to have Jeremy join our organization as part of our senior leadership team. Having someone with his extensive technical know-how and proven managerial experience is essential to our growth plan. Jeremy will be instrumental in leading our Operations group as we expand our efforts to deliver world-class automation solutions and services to the construction industry."* Brave's President Greg Sullivan.

We welcome Jeremy and wish him success in his new role.

Brave Control Solutions Inc. is a technology company that delivers custom automated robotic solutions to world-class manufacturing clients. The company's DNA was forged from a love of new technology and the courage to take risks. With a history of serving automotive manufacturers, our focus for the future is empowering prefab and offsite construction clients to adopt automation for the first time. Brave works with its customers to optimize their operations through the delivery of innovative turnkey solutions. **"think brave"** is the ethos that drives us to seek out and solve our client's most challenging business issues.
